

Measure	Definition
Average daily product revenue	Average revenue per day for a specific product.
Average daily revenue	Average revenue generated per day
Is slow moving	Flags products with low sales velocity. (with average daily product revenue $\leq 1,55$ (=average))
Late day revenue	Revenue generated during late hours.
Late day sales ratio	Share of revenue generated during late hours.
Number of sales days	Number of days a product had at least one sale
Product revenue	Revenue generated by a specific product
Slow moving product rate	Percentage of products classified as slow-moving.
total quantity	Total number of items sold
total revenue	Total money generated from sales
total transactions	Number of distinct sales transactions
total units sold	Same as total quantity (units = quantity)
Zero Sales day frequency	Proportion of days with zero sales
Zero Sales Days	Number of days a product had no sales
